

ABOUT US

ZAVOD-GORELTEX CO. LTD — plant is a **Russian largest manufacturer of modern** explosion-proof electrical equipment.

The mission of the company is to provide the enterprises of petrochemical, gas, mining and other industries, where the possibility of explosion is present, with safe and reliable equipment.

ZAVOD-GORELTEX Co. Ltd. today has:

- **23 years of experience** in explosion protection field;
- **12 000 customers**, among which are such big companies as Gazprom, Lukoil, Rosneft, Bashneft, Sibur, Surgutneftegaz and Rosatom;
- **10 000 m²** — the total area of industrial and office premises;
- **The widest range of explosion-proof equipment**, presented on the territory of the Russian Federation;
- **Own testing laboratory;**
- **500 employees;**
- **8 branch offices and 3 production sites.**

ZAVOD-GORELTEX uses own technology based on experience of Prokopievsk plant of mining automatic machinery, which is the oldest manufacturer of mining electrotechnical equipment, and worldwide known manufacturers of explosion-proof enclosures. All the products are produced of high quality components only. In order to avoid rejects, the products pass strict inspection at all stages of production. **The integrated management system which corresponds to GOST R ISO 9001-2015, OHSAS 18001:2007, ISO 14001:2004 regulatory requirements is operating at the plant.**

The plant has its own engineering laboratory where complex research works and tests are held in order to be able to offer to customers domestic products of the highest level that meets the requirements of tomorrow.

On the territory of Russia and CIS countries there are 8 branch offices, including 3 production sites. They are situated in such a way that the products are sent by a convenient route in the shortest possible time. Highly qualified specialists and practical experience in design and manufacturing of explosion-proof equipment allows us to provide the best technical solutions to a customer. Sales specialists of our company will help you to select necessary explosion-proof equipment which meets the stated parameters or to agree custom-designed item according to the customer's individual requirements. A request is processed within one business day.

For customers' convenience, Goreltx company has developed a unique accounting software of custom-designed equipment. A unique identification code UVG is given to custom-designed equipment in the project. Engineers of the company agree all the parameters of the equipment in the project at different stages of order and provide help in its development and implementation. After that when ordering for manufacturing, it's enough only to specify a unique identification code UVG.

To simplify selection of products and optimize customers' work, the experts of GORELTEX developed 'GORELTEX' computer-aided design system. 'GORELTEX' CAD system is intended to create drawings of explosion-proof terminal boxes, it is distributed free of charge and available for free use on official web site of the company. The user does not need to have special skills for designing explosion-proof equipment or deep knowledge of current standards. The programme makes calculations automatically. There are algorithms, which prevent occurrence of errors when creating a drawing in this system.

Besides, ZAVOD GORELTEX is not just a manufacturer of explosion-proof equipment, but also a maintenance organization, which provides installation supervision in explosion-proof and general purpose industrial grade versions.

The company arranges explosion safety and explosion-proof equipment awareness trainings in the format of training sessions. These sessions are intended for chief power engineers, heads of electrical workshops, control and instrumentation departments, explosion-proof electric motors repair workshops and other specialists of industrial enterprises, where explosion-proof equipment is operated, experts working in installation, engineering, design organizations, in organizations focused on governmental control of production, where explosions may occur. There is a possibility of organizing training at customer's facilities.

ZAVOD GORELTEX takes care of younger generation of experts of oil and gas industry, who are going to face explosion protection in the performance of their duty. At the moment the company cooperates with the leading universities of oil and gas industry in Russia and CIS countries. The students have an opportunity to become familiar with explosion-proof equipment, to do laboratory work and listen to the lectures of professionals.

Many years of experience, high quality standards and multifaceted approach to organization of activity let GORELTEX company become the leading manufacturer of explosion-proof equipment on the territory of Russia.

This is to inform you that renaming of "CORTEM-GORELTEX" Co. Ltd. into "ZAVOD GORELTEX" Co. Ltd. was registered by Interdistrict Inspectorate of Federal Tax Service No.15 for St. Petersburg. We suggest that a new name more exactly reflects a nature of activity of our company.

GORELTEX – explosion protection begins with us!®

Made in Russia
